In the Claims

1. (Currently Amended) A method for maintaining data security comprising:

creating a package associated with a vault, the package comprising data bundled together with one or more permissions for regulating use of the data, the one or more permissions comprising one or more usage rule sets; and

providing a receiver for processing the package and storing the data in the vault, the vault being dedicated hard drive space whose existence and contents are invisible to a user, wherein the existence and contents of the hard drive space are invisible to the user by an assignment of false file names and locations as seen by the user.

2. (Original) A method according to claim 1, wherein the step of processing the package further comprises opening the package and verifying the receiver for processing of the package.
